A Bachelor's graduate in Computer Engineering from Telkom University Surabaya with over two years of professional experience in the IT field. Skilled in network server management (MikroTik), software development, and the implementation of CCTV systems, VoIP, and NAS servers. Experienced in developing asset management systems and implementing ERP solutions to enhance operational efficiency. Detail-oriented, systematic, and collaborative in delivering reliable and scalable IT solutions tailored to business needs.

EDUCATION

Telkom University Surabaya **October 2020 - August 2024**

S1 Computer Engineering - IPK 3,81

Graduated with honors (Cum Laude) with a GPA of 3.81 out of 4.00, and completed an internship as an IT Administration Support at PT Telekomunikasi Indonesia Tbk. My final project focused on the development of an Android-based mobile application (Flutter) for diagnosing Koi fish diseases using an expert system with forward and backward chaining methods, providing an innovative technology-based solution in the aquaculture sector.

WORK EXPERIENCE AND INTERNSHIP

PT Wijaya Inovasi Gemilang - Sleman, DIY **October 2024-now**

IT Staff – HCGA-IT Department

Responsible for managing the IT infrastructure of the Holding and Sub-Holding company PT Mahakarya Kosmetika Indonesia, while driving digital transformation through integrated and efficient systems.

- Improved network stability by up to 95% by building and managing a reliable internal network server and resolving over 20 network performance incidents within 6 months.
- Increased business insights by 40% through the design and development of a WordPress & WooCommerce-based e-commerce website integrated with digital payment systems and a sales dashboard.
- Installed and configured networking devices, including MikroTik routers, managed/unmanaged switches, access points, PABX & IP Phone systems, as well as the integration of 30+ CCTV and VoIP units.
- Built a NAS server used as the company's data center.
- Developed a digital asset management system that monitors over 300 IT assets in real time, reducing asset loss or misclassification by up to 70%.
- Performed installation and troubleshooting on Windows- and macOS-based devices, including software and hardware optimization to support daily operations.
- Participated in ERP implementation to support inventory, finance, and logistics processes, and trained over 40 employees in using the system.
- Prepared SOP and Work Instruction documentation as standard IT operational guidelines, increasing IT team efficiency by 30% in task execution and decision-making.

CV Berlian Cemerlang – Surabaya, East Java

UI/UX Designer – Notulensia *August 2023 – December 2023*

- Successfully designed and developed the user interface for Notulensia, a corporate meeting scheduling platform, using a modern and responsive UI/UX approach.
- Enhanced the platform's visual quality and usability through close collaboration with the development team to ensure consistent design implementation across various devices.

CCTV Project Supervisor – Surabaya City Government *November 2022 – January 2023*

- Successfully supervised 88 CCTV installation sites for the Surabaya City Government, ensuring all installations in North Surabaya met technical standards and project timelines.
- Ensured that all installation points in each neighborhood (RW) complied with SOPs, and supported the technical team in documentation and verification of installation results.

PT Telkom Indonesia, Tbk – Mataram, NTB **August 2023 – January 2024**
IT Administration Support – Internship

- Successfully developed the Outbound Logistics Website System for Witel NTB, supporting the optimization of logistics processes and operational efficiency.
- Successfully initiated and led the socialization campaign for Indibiz.id services to UMKM actors in Mataram City, promoting business digitalization adoption.
- Ensured network performance by regularly monitoring ODP infrastructure and conducting systematic and timely network installations.

PT Nale System Integrator – Malang, East Java **January 2018 – July 2018**
Technician IT – Internship

- Successfully installed CCTV systems, LAN networks, and PABX for various company projects.
- Proficient in the fundamentals of Fiber Optic technology, including splicing and attenuation measurement, ensuring results meet quality standards and work procedures.

ORGANIZATION EXPERIENCE

Head of Medkominfo – Himpunan Mahasiswa Teknik Komputer **January 2022 – January 2023**

- Successfully managed the official website of the Computer Engineering Department at Telkom University Surabaya.
- Successfully designed and created relevant study program content, as well as managed the department's Instagram account and documented various academic and student activities.

CERTIFICATION

- MTCNA, Mikrotik, Number: 1911NA1056, 2019
- Internship Certificate, PT Telkom Indonesia, Tbk, Nomor: C.Tel 15/UM00/R5W-5K520000/2023, 2023
